DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach a combination of the steps of:

(a) a plurality of access points, wherein each of said access points is for performing a first non-empty set of protocol services, but not a second non-empty set of protocol services, for a respective network, and wherein the correctness of each protocol service in said first set is based on a maximum timing delay, and wherein the correctness of each protocol service in said second set is independent of said maximum timing delay, in the specific combination as recited in the claim.

Regarding claim 7, the prior art fails to teach a combination of the steps of:

(b) transmitting a first signal to a second processor, wherein said second processor is programmed to perform each of a second non-empty set of protocol services, and wherein the correctness of each protocol service in said second set is independent of said maximum timing delay, and wherein said second processor is not programmed to perform any of said first set of protocol services, and wherein said first processor is not programmed to perform any of said second set of protocol services, and wherein said first set and said second set constitute a partition of the set of protocol services of a protocol stack, in the specific combination as recited in the claim.

Regarding claim 20, the prior art fails to teach a combination of the steps of:

(d) performing a second protocol service for said first network using said third processor, wherein said second protocol service belongs to a second non-empty set of

protocol services, and wherein the correctness of each protocol service in said second set is independent of said maximum timing delay, and wherein said third processor is programmed to perform each protocol service in said second set, and wherein said third processor is not programmed to perform any of said first set of protocol services, and wherein said first processor is not programmed to perform any of said second set of protocol services, and wherein said first set and said second set constitute a partition of the set of protocol services of a protocol stack, in the specific combination as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
